

introducing the new innovative fence system

DELTAVIEW SECURE

new - new - new - new - new - new - new - new

Betafence has developed the market's first eco-friendly perimeter fence that offers cost-effective security without compromising on quality or rigidity.

Affordable

DeltaView provides a cost-effective fence system without compromising on quality, security or ease of installation.

Up to 20% more cost-effective than comparative fence systems due to thinner wires and larger apertures. High tensile wire results in 30% increased penetration resistance against traditional hand tools. 10 Year Betafence Guarantee on complete DeltaView systems. DeltaView Secure posts are delivered pre-drilled.

Durable

Despite its affordability, DeltaView is a rigid and robust fence system that offers effective security for a wide variety of applications.

30% increased penetration resistance against hand tools by incorporating high-tensile wire. Tensile strength of wire: 800-900 MPa, weld strength at 75% of wire tensile strength. Flexibility tracks the same pattern as alternative fences for 260kg point loads. Posts and fixing mechanisms maintains the complete installation's integrity. Reinforced by means of 2 or more V-bends in the horizontal direction of the panel. Minimal visual impact, even at an angle - ideal for use with surveillance systems.

Sustainable

Every step in the manufacturing process of the DeltaView system has been carefully engineered to create an eco-friendly product.

Up to 30% lighter than the average fence panel, reducing logistics costs and emissions which in turn improves air quality. The environmentally-friendly thermoplastic coating used on DeltaView is free of lead, cadmium and di-2-ethylhexylphthalate (DEHP). Production results in an average 30% reduction in carbon footprint. Manufactured from a high percentage of recycled material. Manufactured in South Africa.

Security Level

Applications

Functionalities

Panels

The panels are made from 2.7mm diameter core wire (3.0mm when coated) with apertures of 78.15mm x 14mm.

The small apertures make the fence difficult to cut and climb. Available in 3m wide panels and three standard height options.

Other heights available on request.

Gates

For comprehensive access control solutions that ensure a uniform level of security throughout your perimeter, inquire about our fit-for-purpose range of swing and sliding gates.

Quality Assurance

Our range of high-security products are locally manufactured in our South African ISO 9001:2015 quality certified facility.

Durable High-Quality Coatings

Available as galvanized , with thermoplastic coating in anthracite RAL 7021 or green RAL 6005.

Posts & Fixing Mechanisms

Bekafix® Secure posts are specifically designed and engineered to be used in combination with Betafence's panels. With Bekafix Secure, the fence is safely tucked behind the lip of the post, resisting against attempts to pry the panel loose from the post. The panels are secured to the post with our Mini Flat Max fixators, firmly bolted through the post using M6 stainless steel security bolts and shear-off nuts that protect against tampering.

This combination of Betafence panels with Bekafix Secure post and superior fixing mechanisms delivers a complete fencing system that ensures the installation's integrity and protection levels.

Optional features

Increase your perimeter's protection by adding sawtooth top rails to further discourage climbing attempts.

Additional Security Accessories

Extended posts and brackets are available to accommodate additional security features such as electric fencing*, flat wrap razor, or BTC coil toppings.

*Supplied and installed by third parties.

DELTAVIEW SECURE
